

Why choose Solid Hardwood Flooring?

No other product has been able to replace solid hardwood flooring as the most durable and beautiful floor available.

For the ultimate hardwood floor, our solid 3/4" hardwood flooring can be sanded and finished on site according to the homeowner's preference. Solid flooring can be sanded and refinished many times, offering a floor which will last a lifetime.

Our flooring is precision milled with the highest quality equipment available. Our full time quality control and technical staff ensure the highest standards of fit and finish.

Environmental

The Amazon forest is the most heterogeneous tropical forest in the world. Selective harvesting, not clear cutting, is the only economically viable approach. Clear-cutting occurs when land is cleared for farming and ranching.

Forest management plans based on selective and sustainable logging practices give land-owners and local people a way to get value from their land; it is the best way to add value to the standing forest resource.

The Amazonian wood industry plays a key role in helping to preserve the Amazon forests by providing value and jobs without chopping the forest down.
