

ExoDek QuickClip Hidden Fastener Deck Clip System

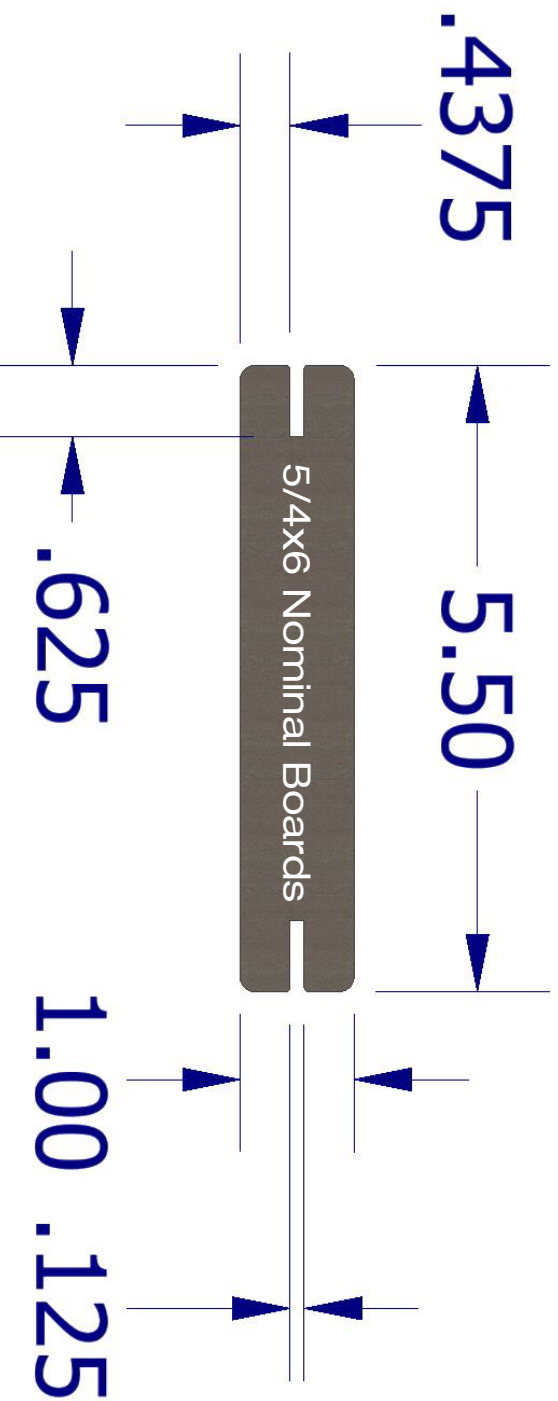

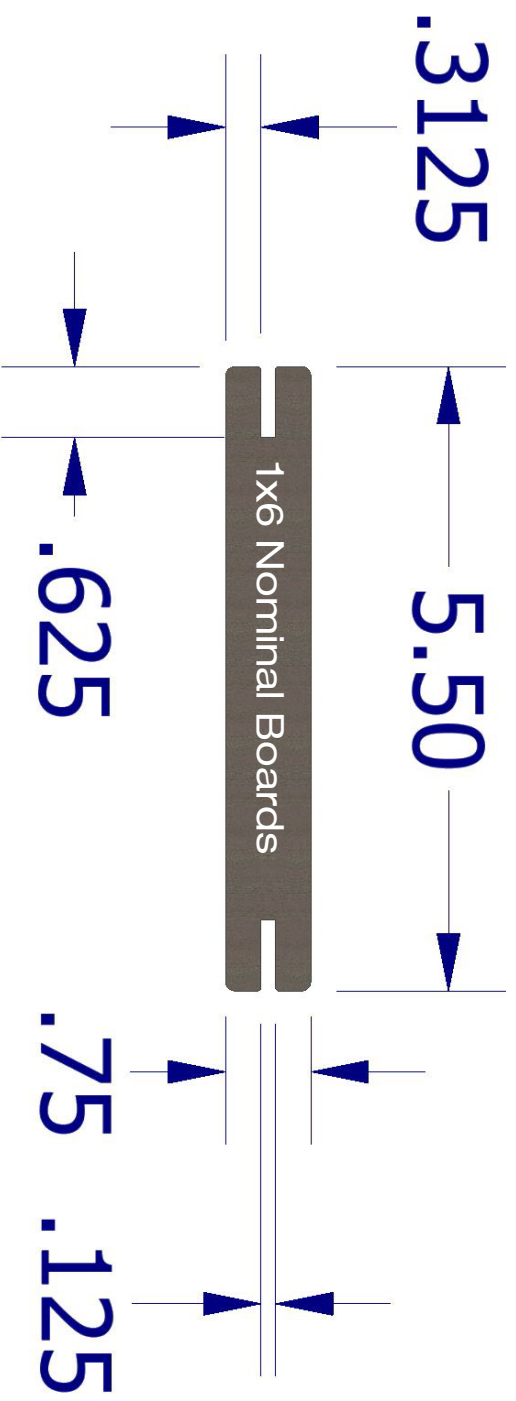

US Patent Pending 62/633,979

Allows for natural expansion and contraction of wood decking with changes in humidity / moisture content of material. ExoDek QuickClips are made from Spring Steel, similar to the steel used in automotive springs, and E-Coated for maximum long term durability and exposure to the elements. #8 deck screws fasten from top for speedy installation. 1/4" gap between boards is built-in to design.

Notes:

1. Grooves to be cut with a standard 1/8" thick saw blade.
2. Grooves to be 5/8" deep.
3. Actual width of boards can vary but must be consistent for each deck installation.
4. Nominal 1x4, 5/4x4, 1x6 or 5/4x6 are all acceptable.
